

Load Loss Measures

- In 2010, eight systems submitted load loss data associated with transmission line and station outages.
- Average MW Affected / MW Served (ASIFI) [IEEE 1366]
- Average MW Affected (Sustained) / MW Served (ASIFI-S)
- Average MW Affected (Momentary) / MW Served (ASIFI-M)
- Average MWh / MW Served (ASIDI, DPUI) Minutes [IEEE 1366, CEA]
- Average MWh (Sustained) / MW Served (ASIDI-S) Minutes
- Average MWh per Interruption (MW-CAIDI) Minutes
- Load Not Served [MWh (unserved) / MWh (Unserved+Served) x minutes] (LNS)
- MW Interrupted per DP
- MWh Interrupted per DP
- Median MW per Interruption
- Median MWh (Sustained) per Interruption
